

Japanese for ingenuity

SORTING TRANSFER VEHICLE SYSTEMS (STV)

Sushi. Trust the Japanese to come up with ingenious labour-saving solutions. Daifuku did just that by inventing the STV which delivers material when and where it's needed. The range of STVs provides impressive throughputs, load carrying capabilities, layout flexibility and space efficiency. The result – seamless integration of automated storage and retrieval for both miniload and pallet load.

Our materials handling equipment is second-to-none, and our experts combine consultation, planning, design, software, project management, installation and training – bringing you true systems integration. To find out more, call **01753 581000**, email sales@daifuku.co.uk or visit www.daifukueurope.com now.
